

SDSN Germany - factsheet

The German Sustainable Development Solutions Network (SDSN Germany) was founded in April 2014 by leading German knowledge centres. The network pools knowledge, experience and capacities of German academic, corporate and civil society organisations in order to contribute to the sustainable development of Germany as well as to German efforts for sustainable development across the globe.

The 2030 Agenda for Sustainable Development broke new ground in 2015: it comprises universal Sustainable Development Goals (SDGs) that address all dimensions of sustainable development in all countries. Germany, too, will have to find solutions for its own future development, and in this sense be a developing country. Therefore, SDSN Germany aims at promoting sustainable development as a guiding principle for politics, business and society with a particular focus on Germany and Europe.

Member organisations of SDSN Germany are at the same time members to the global SDSN. Other organisations can be invited to join the network as partners. **Prof. Dirk Messner** (German Development Institute/Deutsches Institut für Entwicklungspolitik - DIE) and **Prof. Gesine Schwan** (HUMBOLDT-VIADRINA Governance Platform) co-chair the SDSN Germany **Leadership Council**, which mainly consists of member institution representatives. An **Extended Leadership Council** also includes representatives from politics, business, civil society and other advisory bodies. The **SDSN Germany Secretariat** is hosted by DIE.

Members

- Adelphi Research
- Bertelsmann Foundation
- Center for Development Research / Zentrum für Entwicklungsforschung (ZEF)
