

The background features abstract, overlapping green geometric shapes in various shades, including light lime green, medium green, and dark forest green, creating a modern and dynamic feel.

Strengthening The Contribution of Sustainability Standards to the Implementation of SDGs

Harsha Vardhana Singh

Sustainability Standards

- ▶ **Extent of Contribution to SDGs Depends On:**
 - ▶ **Content** of Standard and **Coverage** of Products
 - ▶ Whether They Promote **Inclusive** participation and systems
 - ▶ Whether They Are **Non- Discriminatory** and **Impose No Undue Burden**
 - ▶ Whether the Standard Helps **Improve / Achieve**
 - ▶ income and **development** opportunities,
 - ▶ **environmental and social** objectives
 - ▶ Whether They **Avoid Ad-hoc** or arbitrary actions

Sustainability Standards Disciplines

- ▶ **Disciplines on:**
- ▶ **Technical Regulations**
 - ▶ WTO; Other Plurilateral Trade Agreements
- ▶ **Voluntary Sustainable Standards:**
 - ▶ Government and Other Agencies Developing Principles and Disciplines
- ▶ **Private Sustainable Standards:**
 - ▶ Disciplines As for VSS, plus more aspects need to be addressed

Focus of Most Principles Encompassed in Disciplines Is On:

- ▶ Process for Determining Standards (e.g. in WTO/ISO)
 - ▶ transparency
 - ▶ openness
 - ▶ impartiality and consensus
 - ▶ coherence
 - ▶ development dimension

Focus: Relevance and Effectiveness (e.g., in WTO)

- ▶ International standardizing bodies should:
 - ▶ Take account of relevant regulatory or market needs
 - ▶ Scientific and technological developments
 - ▶ Have procedures to improve communication with the WTO (or any central entity where information is collected and disseminated)
 - ▶ Establish procedures to identify and review standards that are:
 - ▶ Obsolete, inappropriate or ineffective for various reasons

Focus: Coherence Amongst International Standardizing Bodies (e.g., in WTO)

- ▶ Avoid development of **conflicting international standards**
- ▶ Avoid **duplication/ overlap** of work
- ▶ **Co-operate and coordinate** with others:
 - ▶ **Harmonize** standards on as wide a scale as possible

Recent Additional Focus: Part of ISEAL's Ten Credibility Principles

- ▶ Truthfulness
- ▶ Efficiency

- ▶ Improvement ???
- ▶ Rigour ???

- ▶ How will these be defined? Will the requirements add to the burden, i.e will they go beyond reasonable performance criteria?

Recent Additional Focus: Part of ITC's Core Values of Sustainable Trade

▶ Sustainable Development Goals:

- ▶ Act in alignment to the United Nations Sustainable Development Goals to address
- ▶ Root causes of poverty and
- ▶ Achieve development that works for all people

Evidence Confirms Concerns:

- ▶ Proliferation and diversity of standards
- ▶ Lack of harmonisation and consistency of standards
- ▶ A Common Framework Helps To Improve Efficiency and Profitability of Producers
- ▶ New Standards-Related Requirements Keep Emerging:
 - ▶ They Increase Cost and Processes Required

Standards-Related Steps That Improve Development and Trade Opportunities

- ▶ Make **information accessible** to firms
- ▶ Support firms **technically and financially to adopt and comply** with standards
- ▶ Strengthen technical infrastructure
- ▶ Improve certification process and quality institutions
- ▶ Improve **governance** at home

Standards-Related Steps To Improve Development and Trade Opportunities, contd.

- ▶ **Leverage** international mechanisms that facilitate trade
- ▶ **Combine** and aggregate:
 - ▶ **Regional Standards** to help spread of voluntary sustainability standards
 - ▶ Allow **group certification** wherever possible

Way Ahead: Emphasize Principles

- ▶ Principles Specified By WTO, ISO and ITC
- ▶ Several Additional Efforts Emphasized By ISEAL
 - ▶ In doing so, need to identify if any new principles cause undue burden

Way Ahead: Combination of Policies and Collaboration Needed

- ▶ **Combination of Policies** Required (standards and others) : Just Focus on Standards Not Enough
- ▶ However, it is Necessary To Focus On:
 - ▶ **VSS For Addressing Concerns**
 - ▶ **Collaboration Amongst Countries**
- ▶ **Sustainable Development Goal 17**
 - ▶ **Strengthen the means of implementation** and revitalize the **global partnership** for sustainable development

Way Ahead: Collaboration Needed

► Details Agreed For SDG 17:

- 17.14 Enhance policy coherence for sustainable development
- 17.16 Enhance the global partnership for sustainable development, complemented by multi-stakeholder partnerships that mobilize and share knowledge, expertise, technology and financial resources, to support the achievement of the sustainable development goals in all countries, in particular developing countries

Relevant: SDG Follow-Up And Review Principles

- ▶ 74. Follow-up and review processes at all levels will be **guided by the following principles:**
- ▶ c. ... They will help mobilize the **necessary means of implementation and partnerships**, support the **identification of solutions and best practices** and promote **coordination and effectiveness** of the international development system.
- ▶ d. They will be **open, inclusive, participatory and transparent** for all people and will support the reporting by all relevant stakeholders.

Way Ahead: Facilitation

- ▶ Facilitation Must Be Part Of The Approach Through:
 - ▶ Good Governance Regulatory Principles (transparency, inclusiveness, and other WTO principles)
 - ▶ Supportive Efforts (Government, Standard Setting Body, Consumers, Producers)
 - ▶ Collective or Group Participation to Reduce Costs
 - ▶ Move Towards Regional Standards (Concentric Circle Approach)

Way Ahead: Efforts Needed For Improving Disciplines Through:

- ▶ **Formal Agreement** Amongst Nations (e.g. WTO, ISO)
- ▶ **Informal Agreements** Amongst Nations, e.g.
 - ▶ G 20, APEC
- ▶ Processes Established By **Global or Regional Development Bank**
- ▶ Interaction Between **National / Regional / International Platforms** Amongst
 - ▶ **National Focal Points** in the VSS Platforms
 - ▶ **Large Firms** From Different Markets

Way Ahead: Working Together To Use Existing Platforms And To Develop New Ones

- ▶ **Coherence to Achieve Convergence**
 - ▶ Step-wise movement towards a Vision
- ▶ **Establish Mechanism For Collaborative Engagement**, e.g. UNFSS together with Governments and other organisations
- ▶ Develop **Network of Research Institutions** to Support Above Mechanism With Data and Analysis
- ▶ Identify Standards Established By Firms **With Significant Market Influence**
 - ▶ **Competition Policy Criteria** Could be Used For This
- ▶ **Examine These Standards** For Coherence and Consistency

Way Ahead: Simplification of Criteria

- ▶ There is a tendency to specify VSS criteria in more and more detail over time.
- ▶ This likely to result in:
 - ▶ Undue burdensome processes
 - ▶ Highly bureaucratic procedures creating vested interests with high cost and inefficiency
 - ▶ Loss of credibility amongst users about the motivation of the VSS.
- ▶ There is a need to simplify the criteria
- ▶ This requires considering the detail of the requirements and identifying a shortlist of those essential for credibility.

Way Ahead: Coherence and Engagement

- ▶ Identify Which Parts of the Standards Requirements Are ESSENTIAL
- ▶ Seek Solutions
 - ▶ Collect Information For Discussion on Identifying Essential Requirements To Achieve Objectives
 - ▶ Develop Database on Concerns and on Success Cases For Addressing Those Concerns
 - ▶ The concerns could be modelled on the Specific Trade Concerns expressed in WTO's TBT Committee
 - ▶ Use Collaborative Mechanisms To Provide Support With Solutions For Firms

Way Ahead: At This Meeting Itself

- ▶ Participating Countries Here Could **Agree To Link Up Their VSS Platforms To Exchange Information on:**
 - ▶ Major VSS in Their Economies
 - ▶ Concerns Regarding VSS in International Markets
 - ▶ Trade Related Concerns About Each Other's VSS
- ▶ **They Could Develop Website to Seek Solutions** on Issues Each Country is Dealing With
- ▶ Have **meetings periodically** to brainstorm to **co-ordinate approaches to address** selected key issues identified for the meeting

Way Ahead: Content And Focus

- ▶ *Two ways to begin work towards coherence and consistency.*
- ▶ *Begin with identification of some widely used standards.*
- ▶ *One, standards addressing sustainability objectives that are established with multilateral participation but not established by private companies, e.g., ISO standards or CODEX standards.*
- ▶ *Two, consider other VSS which are used widely in international markets.*
- ▶ *This could be based on evidence based criteria for determining standards with large enough impact to be considered for being subject to regulatory control.*

Way Ahead: Content And Focus

- ▶ *The standards in the above two categories could be considered as **models to begin work** to examine consistency and coherence amongst them. In this context, determine:*
 - ▶ *Common points amongst them*
 - ▶ *Points of difference*
 - ▶ *Path towards consistency*
 - ▶ *Mechanisms and Evidence Based Solutions*
 - ▶ *Including a focus on inclusiveness and conditions in low income economies*

Thank You

The background features abstract, overlapping geometric shapes in various shades of green, ranging from light lime to dark forest green. These shapes are primarily located on the right side of the frame, with some extending towards the left. The overall composition is clean and modern.
